Lovibond[®] Water Testing

Tintometer® Group

Safety Data Sheet

acc. to OSHA HCS (HazCom 2012)

Printing date 10/24/2022

1 Identification

· Product identifier

- · Trade name: COD / CSB 0-15000 mg/l
- · Catalogue number: 424438, 2420722, 420722, 2420727, 420727
- · Application of the substance / the mixture: Reagent for water analysis

Manufacturer/Supplier: Tintometer Inc. 6456 Parkland Drive Sarasota, FL 34243 USA phone: (941) 756-6410 fax: (941) 727-9654 www.lovibond.us Made in Germany

· Emergency telephone number: + 1 866 928 0789 (English, French, Spanish)

2 Hazard(s) identification

· Classification of the substance or mixture

GHS06 Skull and crossbones

Acute Toxicity -	- Dermal 3
------------------	------------

H311 Toxic in contact with skin.

H290 May be corrosive to metals.

H318 Causes serious eye damage.

H400 Very toxic to aquatic life.

H314 Causes severe skin burns and eye damage.

H410 Very toxic to aquatic life with long lasting effects.

inhaled.

H334 May cause allergy or asthma symptoms or breathing difficulties if

Sensitization - Respiratory 1

Germ Cell Mutagenicity 1BH340 May cause genetic defects.Carcinogenicity 1BH350 May cause cancer.Toxic to Reproduction 1BH360 May damage fertility or the unborn child.Specific Target Organ Toxicity - Repeated Exposure 2H373 May cause damage to organs through prolonged or repeated exposure.

GHS05 Corrosion

Corrosive to Metals 1 Skin Corrosion 1A Eye Damage 1

Aquatic Acute 1 Aquatic Chronic 1

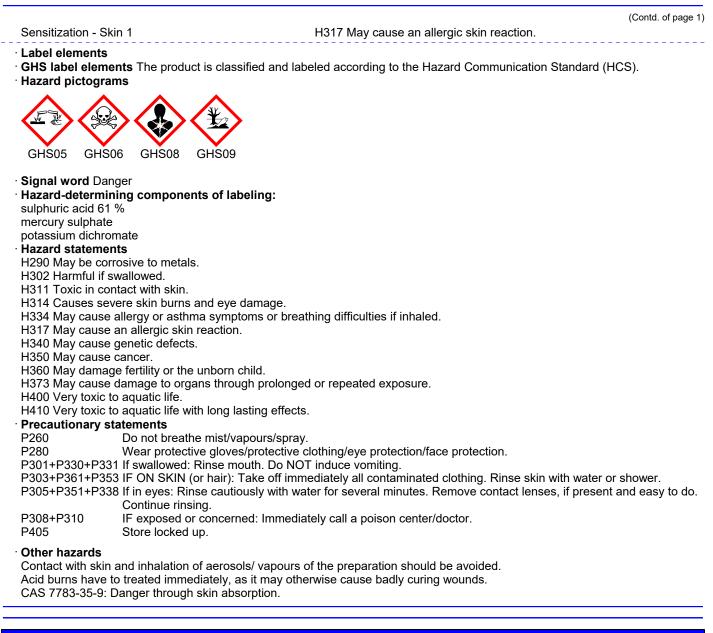

H302 Harmful if swallowed.

3 Composition/information on ingredients

· Chemical characterization: Mixtures

· Description: sulfuric acid solution

· Composition and Information on Ingredients:

The percent content of the chromium compound mentioned below refers to the amount of the chromate ions dissolved in water. The percent content of the mercury compound mentioned below refers to the amount of the pure mercury therein. Cancer Status IARC: Strong inorganic acid mists containing sulphuric acid can cause cancer.

Percent ranges are used due to the confidential product information.

4 First-aid measures

Description of first aid measures	
General information:	
Personal protection for the First Aider.	
Immediately remove any clothing soiled by the product.	
After inhalation:	
Supply fresh air or oxygen; call for doctor.	
In case of unconsciousness remove to fresh air, apply artificial respiration, and consult a physician.	
After skin contact:	
Wash with polyethylene glycol 400 and then rinse with copious amounts of water.	
Immediate medical treatment necessary. Failure to treat burns can prevent wounds from healing.	
After eye contact:	
Rinse opened eye for several minutes (at least 15 min) under running water.	
Call a doctor immediately.	
After swallowing:	
Rinse out mouth and then drink 1-2 glasses of water.	
Do not induce vomiting; immediately call for medical help.	
Most important symptoms and effects, both acute and delayed	
burns	
allergic reactions	
resorption	
after inhalation:	
coughing	
breathing difficulty	
asthma attacks	
damage to the affected mucous membranes	
after swallowing:	
strong caustic effect	
sicong causile check	
vomiting	
bloody diarrhoea	
pain	
cramps	
after resorption: cardiovascular disorders	
unconsciousness	
CNS disorders	
methaemoglobin formation	
Danger:	
Danger of circulatory collapse.	
Danger of gastric perforation.	
Danger of pulmonary edema.	
risk of skin sensitization	
risk of airways sensitization	
Indication of any immediate medical attention and special treatment needed:	
If swallowed or in case of vomiting, danger of entering the lungs.	
Later observation for pneumonia and pulmonary edema.	
Symptoms of poisoning may even occur after several hours.

5 Fire-fighting measures

Extinguishing media

- Suitable extinguishing agents:
- CO₂, sand, extinguishing powder.

Water spray • For safety reasons unsuitable extinguishing agents:

- Water with full jet
- --> exothermic reaction.

· Special hazards arising from the substance or mixture

The product is not combustible.

Formation of toxic gases is possible during heating or in case of fire.

- In case of fire, the following can be released:
- Sulfur oxides (SOx) mercury vapours
- chromium oxides
- Potassium oxide
- · Advice for firefighters
- Protective equipment:
- Wear self-contained respiratory protective device.
- Wear fully protective suit.
- Additional information

Collect contaminated fire fighting water separately. It must not enter the sewage system. Dispose of fire debris and contaminated fire fighting water in accordance with official regulations. Ambient fire may liberate hazardous vapours.

6 Accidental release measures

· Personal precautions, protective equipment and emergency procedures

· Advice for non-emergency personnel:

Wear protective equipment. Keep unprotected persons away.

Avoid substance contact.

Ensure adequate ventilation

Use respiratory protective device against the effects of fume/dust/aerosol.

· Advice for emergency responders: Protective equipment: see section 8

· Environmental precautions:

Do not allow product to reach sewage system or any water course.

Inform respective authorities in case of seepage into water course or sewage system.

Methods and material for containment and cleaning up:

Ensure adequate ventilation.

Use neutralizing agent.

Neutralize with diluted sodium hydroxide solution.

Absorb with liquid-binding material (sand, diatomite, universal binders).

Dispose contaminated material as waste according to item 13.

• Reference to other sections

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

7 Handling and storage

- · Precautions for safe handling
- · Advice on safe handling:

Open and handle receptacle with care. Prevent formation of aerosols. Work only in fume cabinet.

· Hygiene measures:

Do not inhale gases / fumes / aerosols. Do not get in eyes, on skin, or on clothing. Take off immediately all contaminated clothing.

Store protective clothing separately.

Wash hands before breaks and at the end of work. Do not eat, drink or smoke when using this product.

(Contd. of page 4)

- Conditions for safe storage, including any incompatibilities • Requirements to be met by storerooms and receptacles: Store in a cool location.
- Keep only in original container.
- Information about storage in one common storage facility:
- Store away from metals. Do not store together with alkalis (caustic solutions).
- Store away from flammable substances.
- · Further information about storage conditions:
- Store locked up or with access restricted to technical experts or their assistants.
- Ensure that persons do not handle until all safety precautions have been read and understood.
- Keep receptacle tightly sealed.
- Protect from heat and direct sunlight.
- Protect from exposure to the light.
- Protect from humidity and water.
- Recommended storage temperature: 20°C +/- 5°C (approx. 68°F)
- · Specific end use(s) No further relevant information available.

10 Stability and reactivity

· Reactivity see section "Possibility of hazardous reactions"

· Chemical stability Stable at ambient temperature (room temperature).

- Possibility of hazardous reactions
- Corrosive action on metals. Reacts with metals forming hydro

Reacts with metals forming hydrogen (Danger of explosion in case of large amounts!)

When diluting, always add acid to water, never vice versa. Diluting or dissolving in water always causes rapid heating.

Reacts with acids, alkalis and oxidizing agents.

- Reacts with reducing agents.
- Reacts with peroxides.

Reacts with halogenated compounds.

Reacts with ammonia (NH_3).

- Conditions to avoid strong heating
- Incompatible materials:
- metals

combustible materials

organic solvents

organic substances

• Hazardous decomposition products: see section 5

11 Toxicological information

· Information on toxicological effects

• Other information: see section 8 / 15	(Contd. of page 8)
Cancer Status of Sulfuric acid: The International Agency for Research on Cancer (IARC) has classified "strong inorg mists containing sulfuric acid" as a known human carcinogen, (IARC category 1). This classification applies only to containing sulfuric acid and not to sulfuric acid or sulfuric acid solutions. A2 (Suspected for humans) by ACGIH	ganic acid mists
· Synergistic Products: None	
 CMR effects (carcinogenity, mutagenicity and toxicity for reproduction): The following statements refer to the mixture: Germ Cell Mutagenicity 1B, Carcinogenicity 1B, Toxic to Reproduction 1B 	
 Germ cell mutagenicity May cause genetic defects. Carcinogenicity May cause cancer. Reproductive toxicity May damage fertility or the unborn child. 	
 STOT (specific target organ toxicity) -single exposure Based on available data, the classification criteria are not STOT (specific target organ toxicity) -repeated exposure May cause damage to organs through prolonged or repeated exposure. 	: met.
· Aspiration hazard Based on available data, the classification criteria are not met.	
 Additional toxicological information: CAS 7789-00-6 Potassium chromate / CAS 7778-50-9 Potassium dichromate Main toxic effects [GESTIS]: acute: irritation/damage to mucous membranes and skin, sensitizing effect (skin/respiratory tract). Damage to kidne liver. 	ys, blood and
chronic: irritation/damage to the skin and mucous membranes, especially in the nose and throat. After penetration o substance into wounds, these tend to form ulcers. Allergic skin and respiratory diseases.	of the
resorptive effects: primarily damage to the kidneys up to acute kidney failure; in addition, hemorrhagic diathesis, thrombocytopenia, anemia, possibly methemoglobinemia;	
rarely: rapid onset of CNS damage or hepatitis as a late consequence; also promoting respiratory infections. Mercury compounds have a cytotoxic and protoplasmatoxic effect. The principal signs manifest themselves in the CNS.	
Swallowing will lead to a strong caustic effect on mouth and throat and to the danger of perforation of esophagus ar The aerosol is corrosive to the eyes, the skin and the respiratory tract. Inhalation of aerosols may cause lung oeden	
CAS: 7664-93-9 sulphuric acid	
. (source: GESTIS) Main toxic effects	
Acute: Irritation up to chemical burns to the mucous membranes and skin, danger of serious damage to the eyes a Chronic: Irritation to the eyes and airways, erosion of the teeth, damage to the skin	and lungs

Further Information:

Concentrated S. differs considerably from dilute Sulfuric acid with regard to chemical properties and effects. With increased dilution Sulfuric acid acts less aggressively.

CAS: 7783-35-9 mercury sulphate

. (source: GESTIS) Main toxic effects: acute: irritant to corrosive effect on mucous membranes

acute: irritant to corrosive effect on mucous membranes and skin, skin-sensitizing potential, damage to the airways and lungs, gastrointestinal complaints, circulatory disorders, kidney dysfunction chronic: skin and mucous membrane damage, kidney damage

STOT: the use of mercury nitrate in ointments as an antiparasitic ingredient and experiments on rats (repeated high oral doses) have shown that the kidneys are the most sensitive target organ.

· Other information Other dangerous properties can not be excluded.

13 Disposal considerations

· Waste treatment methods

· Recommendation:

Must not be disposed of together with household garbage. Do not allow product to reach sewage system. Hand over to hazardous waste disposers.

- · Uncleaned packagings:
- Recommendation: Disposal must be made according to official regulations.
- · Recommended cleansing agent: Water, if necessary with cleansing agents.

Relevant phrases

H272 May intensify fire; oxidizer.

H290 May be corrosive to metals.

H300 Fatal if swallowed.

H301 Toxic if swallowed.

H310 Fatal in contact with skin.

H312 Harmful in contact with skin.

H314 Causes severe skin burns and eye damage.

H317 May cause an allergic skin reaction.

H318 Causes serious eye damage.

H330 Fatal if inhaled.

H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.

H340 May cause genetic defects.

H350 May cause cancer.

H360 May damage fertility or the unborn child.

H372 Causes damage to organs through prolonged or repeated exposure.

H373 May cause damage to organs through prolonged or repeated exposure.

H400 Very toxic to aquatic life.

H410 Very toxic to aquatic life with long lasting effects.

· Recommended restriction of use: professional/industrial use only

Date of preparation / last revision 10/24/2022
