D002 TTC/MALT Dipslides (pack of 10)

With dual agar for total count / yeast & molds

Classify and assess risks reliably
Dipslides indicate the presence of microorganisms not only in water but also on surfaces, offering a semi-quantitative method of measurement. In most applications, microbiological risks can be reliably classified and assessed so that countermeasures can be initiated immediately, especially within the framework of monitoring and control programs that comply with standards and guidelines. For example, they can be used in the context of cooling tower hygiene in accordance with VDI 2047 to comply with the 42nd BImSchV, in order to detect biological fouling at an early stage and to prevent potential plant shutdown.

Versatile in all important applications
Our dipslides offer valuable assistance in monitoring microbial growth wherever the potential can exceed 100 (10^2) organisms in one milliliter of sample liquid. These include, in particular, industrial water, industrial fluids, food manufacturing, dental practices, breweries, environmental hygiene, leather industry, fuels, dairy industry, pool & spas and cosmetics.

The flexible performance
Flexible paddles & raised agar profile allow the user to test both surfaces and liquids. A dedicated app is provided to support evaluation & documentation.

Durability and correct use
Dipslides have an average shelf life of 6-9 months, depending on the manufacturing cycle. They can be used after this date as long as no contamination or visible shrinkage is shown on the agar surface. Excess water in the bottom of the slide indicates that the storage temperature is too high. The Lovibond® Incubator for dipslides is available for correct incubation at constant temperature.

Part Number: 56B010210
D002 TTC/MALT Dipslides (pack of 10)

This dual agar has several capabilities at the same time and with its nutrient agar with TTC addition as well as the malt agar can determine the total bacterial count as well as yeast and mould. It complies with the standards HSG274 Part 1, VDI 2047 and Health & Safety at Work Act.
