Water Safety Kit Chemical

Mobile Laboratory for chemical parameters of potable water testing

- Analysis of most important chemical parameters
- Complete test equipment in conjunction with Water Safety Kits Microbiology
- No further test equipment required for chemical analysis

货号: 56K681253

You need safe, fast and reliable test results in difficult situations like disasters or potable water monitoring in rural environments without laboratories? The Lovibond® Water Safety Kit Chemical offers the most important methods and equipment in one case, designed to accompany you in each situation.

It comprises our MD 600 photometer, TB 211 IR turbidity meters and SD 50 AND SD 70 pocket electrochemistry meters. This kit can be used in conjunction with the Water Safety Kits Microbiology to provide a complete suite of tests for potability of water.

The kit comes with reagents for Chlorine, Ammonia, Nitrite, Nitrate, pH, Conductivity, Turbidity but can be expanded using our reagent packs to include any of the tests for the MD 600.

Water Safety Kit Chemical

Take everything you need for chemical analysis of potable water quality in one hand. This Water Safety Kit is the smallest in the range, portable in a rugged, waterproof case with 200 reagents for each parameter, allowing numerous measurements for its small footprint. It is easy to use even by nonprofessional operators due to simple pictorial instructions.
